Online voting system website templates free download. Online voting system templates free download. Free css templates for online voting system.

Voters have to put their signature during the voting if you enable the digital signature. Other features available on this free website: Voters can comment via Facebook comment page or on the result page of the website. After you complete designing the voting form, the website generates a URL and an HTML code. You can download the report in CSV and PDF formats. The welcome screen should contain a welcome message, which can be set by the presenter. In the free version of this website, you will get up to 100 MB of storage space. Some of the widgets include E-Signature, Google Analytics, Image Slider, Timer. EmailMeForm EmailMeForm EmailMeForm is another free online website for taking online voting surveys. You will find many customization options here. It offers a good variety of questions for a voting survey, like Multiple Choice Questions (MCQs), Quiz, Matrix, Scales, etc. Just click on Poll button and write a questions is available on the website. Result: It shows a detailed report which includes the following information: Voters' IP Address. As a free user, you have some limitations, like you can create up to 3 reports, etc. Electionrunner Electionrunner is one more free online voting website in this list, which allows you to conduct online voting for up to 20 voters. You can allow voters to vote for more than one options in Multiple Choice Questions. You can also use this website for online voting. POWr POWr is a very simple online voting. You can also use this website for online voting. Numeric Slider, Fancy Checkboxes, etc. If the voters want to view the result of the poll, they can submit their email address after the completion of online polling. While adding a voter, you have to provide a unique ID and password for each voter. You can close the voting anytime. All types of questions are available in free plan. For each new elector, you have to create a unique voting ID. These are Multiple Choice, Rating, Ranking, and Free Text. All your forms for online voting are 100 percent secure. It has multiple categories of questions that can be added for creating a survey. The free plan of this website offers the following features: Unlimited voters, i.e. the surveyor can invite the unlimited number of voters to vote by sharing the generated link. It generates the responses in Pie Chart format along with the percentage. You can also add electors manually. Time taken by each voter to complete the survey. Besides this, you can also add electors manually. the voters. A URL is generated by the website in order to conduct voting at different platforms. You can share your designed online voting survey by sending it on your website. It is the only online voting system in this list in which all the voters have to be online at the same time. You can also embed polls in your website. On each survey, up to 100 people can vote. By posting the voting form directly on different social platforms, like Facebook, WordPress, Dreamweaver, Tumblr, Weebly, Blogger, etc. This feature is set by default, which can be changed by the surveyor. For the former one, you can set the maximum and minimum limit for voters to mark options i.e. you can choose more than one options for a question within specified limit. You can select the type of result layout from Bars, Donut, and Pie Chart. Survey: The only difference between Survey and Poll is here, you can create more than one question at a time and publish them on the internet for voting. The good part of this online voting website is that it shows the preview of a question type on hovering the mouse cursor. You can also add an image to each question. You can also share it directly on Twitter, Facebook, Google+, and email without copying the generated link. It offers a lot of customization features. The slides will be presented in the real time. You can allow voters to tick more than one answers. Widget is an additional feature of this free website for online polling. NOTE: The free plan of this website offers limited features, like up to 25 form submissions per month, 6 form fields per form, etc. This website offers a very good feature by which you can send a test email. Export option is also available on this website, by which you can save the result in Excel and PDF formats. If I talk about the result, it generates a detailed analysis report in a tabular pattern, which has the following information: Date of Voting, Answers of Questions asked in Voting, IP Address, Country Name, Browser Name, etc. Plus, you will also get an unlimited size of audience in free plan. However, you can also end the ongoing election manually by signing into your account. You can design your online voting survey by adding different types of questions, such as Short Text, Long Text, Dropdown, Single Choice, Multiple Choice, Star Rating, etc. It offers three services for free: Poll, Survey, and Personality. However, you can carry out unlimited surveys in the free version. Also, the website didn't mention the maximum numbers of voters who can take part in online voting. After

creating an online voting survey, you can either share its generated link or embed it on your website. You can enable the digital signature to make the voting survey to the added contacts. Some of these formats include Graph, Doughnut Line, Column, Pie Chart, etc. Like other online voting websites, Google Forms also has a lot of customization options. View My Typeform: As the name implies, it is a preview button. If you hover the Pie Chart, it shows you the number of votes for each section. The presenter can start the online voting after voters come online for the same. It displays the result in both percentage and graph. Some of these categories include Community, Customer Feedback, Events, Healthcare, Political, Just For Fun, Non-Profit, etc. It does not have a feature to create and send only one question at a time. Besides this, you can also add an image or a video to the question. Before starting an online voting survey, you can also generate a link of the survey to be posted on social media. Voters can vote only on that slide which is currently opened by the presenter. Plus, it also generates a graphical pattern for the number of voters voted. Survey Planet is yet another good website for online voting surveys. To design a report template, you can also design a captcha code for the submission of votes. Other features of this free online voting surveys for free. Moreover, you can also set a password for people to take the voting survey. Voters Select: This feature lets voters select a single or multiple options for the same question. You can add any image to the background or select any of the color palettes available on the website. Thank you message is displayed here. It offers very good features in the free plan. A Captcha Code option is added to each form by default and you cannot delete this option while designing the voting form. If you want, you can export the result in CSV format. Google Forms Google Forms is a very good online voting systems in this list, you can mark any question as mandatory. Like other online voting survey in order to get all the responses of voters. As you type a question, it shows its preview automatically. You will get reports in the same pattern as you design. You can conduct online voting survey and selecting the category understand. which the survey falls. Some of these websites are WordPress.com,WordPress.org, Zoey, Facebook, Dreamweaver, Blogger, iWeb, Google Sites, Joomla, Frontpage, Tumblr, Yola, Drupal, Wix, Shopify, etc. Before sending the voting Websites. SurveyMonkey is my favorite online voting website. Besides this, you will get other information of voters, like voter's location, time taken by voter to complete the survey, OS used by him, and date of voting. Poll Junkie is another one of a simple online voting system. No question types other than Multiple Choice Questions are available here. Saving the responses: You can download responses in CSV format. A very interesting feature available on this website is that it lets you embed the form on more than 20 websites. However, you can enable or disable this feature as per your preferences. For each online voting, the website generates a link. You can save the report in TXT format or take its print out. It not only offers feature of an unlimited number of voters, but also a feature of real time voting. It also lets you export the data in CSV format. You will get an automated generated email for every voting response. FreeOnlineSurveys FreeOnlineSurveys is yet another free online voting system. After building the online voting survey, it's time to design its layout. You can use these free voting websites to create an online survey on which users can vote. That's all. Besides this, it also displays the detailed analysis of each voter in the form of Graph, Doughnut, Line, Column, Radar, and Pie Chart. Result: It shows all the responses in tabular format, which can be downloaded in CSV and XLS formats. It shows the preview in Desktop mode, Tablet mode, and Mobile mode. Ballotbin is yet another free online voting website. Clicking on Preview the survey you created before sending it to multiple persons. Some of these question types include Multiple Choice, Picture Choice, Question Group, Statement, Long Text, Short Text, Rating, Opinion Scale, and a lot more. It also has a variety of beautiful themes. Poll: Creating a poll is very simple. To start a poll, simply add a question and its options. You can choose from 5 widgets to design your voting survey has the following features: The online voting contains advertisements. Some of these are Short Text Entry, Long Text Entry, Long Text Entry, Long Text Entry, Long Text Entry, Star Rating, etc. Voters can see the result immediately after voting. Multiple Choice, creating a voting system, there is an option by which you can allow more than one answer to each question using check boxes. Personality Quiz: The features offered by this voting system are same as that of Survey. EasyPolls is a very simple online voting, viz; Quizzes Forms, and Polls. Voters' location (country wise). Type: In this section, you can add comment box, info box, etc. It also lets you create an online polling survey based on images. Besides this, 4 different layouts are also available to design a report. In the Results section on the website, you can view the results of all the conducted surveys. JotForm JotForm is actually a form creating website, which can be used to create online voting surveys. You can invite up to 250 voters via email. When you are done, you can send it up to 100 people via email. But, I didn't find any option to view the data of each voter separately. They will then directed to the questions and answers screen. This free voting website has many advanced features, like Ballot Receipt, Vote Confirmation Message, etc. You can view the forms submitted by a maximum of 1000 voters. Apart from sharing the link, you can directly share the post on Facebook, Twitter, Google+, Linkedin, etc. It comes with a very simple interface which makes the process of creating online polls easy. You can add multiple languages, like English, Afrikaans, Bengali, Greek, German, Hindi, Spanish, Urdu, etc. All in all, Mentimeter is one of the best online voting websites. Besides this, you can also select whether the voter can see immediate results just after voting or not. Murvey Murvey is another free online voting website. You can save it in XLS format. One very interesting feature of this select whether the voter can see immediate results just after voting websites. online voting website is that you can create surveys that you can schedule to be sent later. Some of these questions are MCQs, Dropdown, Long Answer, Short available only for paid members. Make online polling interesting for voters by adding different types of questions, such as Single Line Text, Rating, Number, Multiple Choice, Paragraph, Dropdown, etc. Write-ins: This feature lets voters write anything in answer to a particular question. You have to design the reports before you start the online voting survey. It provides up to 50MB of free storage space. Sharing Options: After you are done with creating the online voting survey, you can share it via the following modes: By sending the generated link on different platforms. The average time depends on the time taken by individual voters. You can also allow the voters to mark more than one answer for a single question. The basic (free) version of this software comes with a limitation of 10 questions per survey. Here is a list of Best Free Online Voting Websites. This free version lacks many important features, like IP Address Filtering, Location Tracking, etc. You can modify the screen to show one question at a time or all questions at once. As a basic member, you can create up to 5 forms consisting 10 fields per form and view 100 submissions per month. Unlike other voting websites, you cannot create a detailed online voting survey using this one. Moreover, if you want to explain your question, you can do the same by adding more information to that question (maximum limit of characters is solve) and view 100 submissions per month. 5000). You can also enable an option for voters to type their own answers. You can make any of the added fields required (mandatory). It also provides you a feature to browse images in each question. Check out some general features of this free online voting website: You can make any of the added fields required (mandatory). It also provides you a feature to browse images in each question. English, Hindi, Bengali, German, Deutsch, Tamil, Telugu, Chinese (Simplified), Chinese (Traditional), Afrikaans, Yiddish, Zulu, etc. You can make the online voting survey attractive for the voters by adding different themes. Pie Chart displays the percentage of votes. It also has an option to take a print out of responses. Most of these free online voting websites generate a detailed analysis report of votes in the graphical pattern. Besides this, a number of text formats are also available on the website. You can add multiple people to the voter's list, but actual limit for this wasn't specified. It also has a preview ballot button, which you can use to preview your created online voting survey. This free additional set of the voter's list, but actual limit for this wasn't specified. It also has a preview ballot button which you can use to preview your created online voting survey. online voting system has a very simple interface. You can create voting surveys for participants in three languages: English, Dutch, and French. Besides this, you can customize the added fields, like you can make any of the fields mandatory, add a blank box in MCQs to be filled by the voter if his/her choice differs from the given choices, etc. When you are done, publish it on the internet. It also has a preview mode, which you can use to preview your created online voting survey before posting it. Other than this, you can also add a Captcha Code box to your online voting survey before posting it. survey. Some of these websites have a feature using which you can mark a voting question as mandatory. You can also view the responses of all the voters individually. Some of these are Community, Customer Feedback, Events, Healthcare, Political, Just For Fun, Non-Profit, etc. You have to send this link to the voters via email. You can add voters either manually or by uploading a text file containing emails. You can view up to 10 results per form. The Overview button gives you a bird's eye view of your created online voting. It also generates a HTML Code by which you can embed the voting form on your website. time for the online voting. It also shows the report in a tabular format. The website generates a detailed analysis report it to CSV, Excel, and PDF formats. Here, the process to create an online voting survey is same to that of the most of the online voting websites in this run-down. In these sections, you can add a variety of questions, like Multiple Choice (Single Select), Multiple Choice (Single Select), Star Rating, Drop Down List, Order, Ranking, Slider, Comments Box, Text Box, etc. There are a lot of question types to select from. It also has an option to design a Captcha Code for form submission. Voters will take part in online voting by entering their respective voter ID and password. Google Analytics is an advanced feature of this free online voting website. Report: It shows a detailed report in both Graphical Pattern and Pie Chart. Some of these include Short Answer, Paragraph, Multiple Choice, Checkboxes, Drop Down, Linear Scale, Checkbox Grid, etc. It also has an option of link generation by which you can share the quizzes or forms on different platforms. It offers a lot of options to share a question for online voting, which include Facebook, Twitter, Gmail, Linkedin, etc. It also has a limit of participants. Apart from this, it also features lots of font styles. It only lets you send one question at a time. All the questions are to be added on one page only, you are not allowed to create more than one page in the free plan. To begin the voting, presenter has to preview the slides of the presentation that he created. Typeform Typeform is another good website to create an online voting survey. Remember, your title reflects the summary of your voting survey, hence, choose it wisely. A digital signature is one of the most important features for online voting surveys. You can modify Multiple Choice and allow voters to select more than one choices. These widgets are Graph, Pie Chart, Number, Text, and Datagrid. If you want to view the separate answer of each voter, click on VIEW BALLOTS button in the results section, but the identity of all the voters will be hidden. One of these free online voting websites displays the result in multiple formats. I am not sure how many widgets are available here, as even after viewing more than 100 widgets, the list was not ending. Formsite is another freee online voting websites displays the result in multiple formats. online voting website. While designing the questions and answers screen, you will get a lot of question types to add. Limitations of free plan of Formsite: You can create up to 5 forms per month for an online voting survey. Each welcome message which is defined by the presenter (a person who conducts an online voting survey. survey). After designing an online voting survey, you can preview it. If you are creating polls, you can publish only one question at a time for online voting among a maximum of 10 people. You can allow voters to mark multiple answers for a question. Like other online voting websites, it also has a variety of questions to be asked in a survey. It generates a detailed Graph and Pie Chart for conducted online voting. You can also select the theme from the available templates. A variety of question types are available to the theme from the available templates a detailed Graph and Pie Chart for conducted online voting. survey. It generates the voting results in a tabular format showing the information of each voter separately. The free plan of this website has some limitations, like you cannot export and share the result of the online voting. If I talk about the type of questions, you will get only four types of questions for designing an online polling survey. Total number of responses. In addition to this, it also generates statistics, where the responses summary is displayed in both tabular form and Pie Chart including the percentage of each section. Apart from this, it also generates statistics, where the responses summary is displayed in both tabular form and Pie Chart including the percentage of each section. responses from a single user, Send me an email for each response, Include Facebook like button below the survey, Include Facebook share button below the survey, etc. Most of these online voting websites come with a variety of questions to ask to a user, like Multiple Choice Questions, Drop Down, Rating, etc. Start by setting up a suitable title for your survey. It also has a feature to break a page or section. It also generates an HTML code which you can embed on your websites. You are allowed to create only a single page survey. You may also like some best free Websites To Learn Morse Code, Websites To Learn Morse Code, which you can embed on your website. results immediately after voting. Apart from this, you can also add other fields to the survey while creating it, like Google Maps, Share Options, Terms of Service box, Electronic Signature, etc. You can let your voters review the polls before submission. Ballot Receipt: If you enable this feature, voters will get a voting receipt immediately after completing the voting. Mentimeter is my another choice after SurveyMonkey. The process to create online voting survey is very simple. Besides uploading an image from PC, there are 5 more ways for the same. Click on it anytime and the website will show you how your online voting survey looks like. for the voters to fill in answer for a specific question. You can download the generated reports in CSV format. Start by writing a suitable title for your survey and add questions related to the title. Moreover in one of these websites, you can also allow voters to lock their answers once they marked them, change their answers even after the completion of voting, etc. Pollsnack is the next in this list of free online voting website. Customization options for display are also available on the website. In the build section of this website, you will get many different types of questions, which you can add in your online voting survey in order to make it more interesting for voters. You will find many options to design a welcome screen. If you want to embed the created form on your website, that feature is also available here. You can view up to 100 responses. After the completion of a questions, you can share the generated link with your friends for voting. Some of these questions are Multiple Choice Questions, Questions which include rating, Comment Box, Drop Down Menu, etc. For example, if an online voting survey is taken out among 4 people, then I will be able to view their individual responses as well as a combined report in the form of a graphical pattern showing the response of each person with a different color. By sharing the generated QR Code. All your data will be stored securely on website for unlimited period of time. This will mark the respected field with a red colored star, which indicates that the particular field is necessary to answer. Unlike other online voting services, you can allow candidates to select more than one option for the asked questions. Limitations of the free plan offered by this website: You can view up to 100 responses per month. The sent email will be received by all the people within 5 minutes. After creating an online voting survey, you can make it more attractive for voters by creating a background theme. For each survey, you can set its start and end time. If you want any information related to voters, you can add some more fields in your survey, like Name, Address, Email, Phone Number, Website, etc. PollMaker PollMaker is another free online form creating tool, which can also be used to create voting polls. As people vote on the survey, you will receive an automated email for their responses. It offers multiple options for each question, like Type, Write-ins, Voters Select, Allow Voters to Abstain, etc. You can add electors (people for voting or survey) directly by browsing the CSV file from your PC. After you receive an email, you can send a thank you message to them. Four beautiful theme templates are available: Basic, Colorful, Classic, and Textured. If you want, you can make any of the fields mandatory by enabling the required features of this free voting website: Different text formats are available on the website. In addition to this, you can also post this link on Facebook. Result: It presents the result of voting in a table containing the names of all participants. To create a poll, it offers a number of elements which include Multiple Checkboxe, Single Checkboxe, Sing except for polls. Plus, you can also embed it on your website. The results generated by this website contains the following information: Total number of visits. If you own a website, you can embed your created online voting form on your website, else you can conduct online polling by sharing the URL. Themes: Most of the themes are paid, but in the free plan, you will also get some good themes. Welcome Screen is the first screen of the online voting presentation. Here, you can start online voting result in the form of Graph and Pie Chart. After completion, you can share quizzes or forms via email or embed it into your website. It features only two types of questions and Ranked Choice Questions to be asked in online voting: Multiple Choice Questions to be asked in online voting website. It features only two types of questions to be asked in online voting website. like 100MB storage space, 100 submissions per month, etc. When you are done, you can share the form via email or by sending the generated link on various platforms. The combined summary of voting can be viewed in the Report Section of the website, in the form of Bar Graph and Pie Chart along with the percentage of polls. Abstain: You can also let your voters select whether to abstain or not for a particular question. The good part of this website is that you can create online voting surveys without any registration. In order to view the next slide, voters have to wait until the presenter switches the slide on his computer. Voters have to fill this Captcha Code before submitting their responses. Results: Results are available in both Pie Chart and Bar Graph pattern. You can make it either mandatory or keep it optional. This is the only disadvantage of this website. Besides this, you can use advanced options in case you want any information from the voters. It also has an option to add multiple sections in a single survey. It also has a variety of question types, which include Multiple Choice, Rating, Essay, Scale, Form, Scoring, etc. SurveyMonkey SurveyMonkey is a free online voting or say Live voting. You can upload images by Taking a Snapshot, By URL, from Google Drive, from your Albums, and by Custom Search. As you explore the list, you will find that the features offered by them differ from one another. Mentimeter is actually a presentation creating website. Date on which voters voted. When you are done, you can conduct online voting by sharing the generated link on different platforms. You can also shorten the generated link. If you want, you can download the result in CSV format. You can create polls in multiple languages. Vote Confirmation message: "Are you sure to submit your ballot?". When you are done, you can share its generated link with your friends for online voting While adding questions, you can add a short description to them (if required) and make any of them mandatory. Besides this, you can also add images to each of your question. You can also add images to each of your question. any question mandatory. First of all, if I talk about the design of the survey, the online voting survey is divided into three parts, namely, a welcome screen, questions screens, and thank you screen. While some websites let you export the result in CSV format, some let you export the same in TXT format. This is the default message, which can be changed as per requirement. For quizzes and forms, there is a maximum limit of 20 questions per voting. It also has a preview button. The presenter or surveyor will get the live responses from the voters as they vote. The good part of this free online voting website is that it has a preview button which lets you preview your questions before sending them. You can add different types of questions, like Single Line Text, Number, Paragraph Text, Checkbox, Dropdown, and many more. Before explaining its features offered by it in its free plan: You can create up to 5 forms per month. By embedding the online voting form on your website. In order to take a print out of the online poll, a separate link is generated by the website. Results: It generates the reports in Pie Chart format, displaying the percentage value of each vote. Nost of these websites also have a preview of each question. I don't know what is the maximum limit of adding questions in each online voting survey as it wasn't specified. Various options in this are they can change their answers on the survey, or lock their answers once they marked them. First of all, you have to design a welcome screen for your survey. In preview mode, use test as both login ID and password. Click on the above screenshot to view the report that I designed. Like other online voting websites, it also has a lot of customization options. One of the good features of this website is it offers a variety of questions, like Multiple Choice Questions, Drop Down Questions, Star Rating Questions, Star Rating Questions, Comment Box, etc. The voting will get started as soon as the voters click on the Start button. Thank You Screen is the last screen. The questions can be asked only in Multiple Choice format, as no other format for asking questions is available. You cannot add more than 10 fields in each survey. You can also copy all the responses in Google Spreadsheet. Moreover, it also lets you share the total number visits to your conducted voting survey. You can share the form by sending the generated link. You can also view the result in original format. Moreover, you can also create a unique password for each elector. Voters' device, like computer, smartphone, etc. The maximum limit of questions per voting survey was not specified. You can ask them to fill their Name, Address, Phone Number, Website (if any), Digital Signature, etc. Other features of this free online voting system: Multiple themes are available on the website. Read the article to know more about it. Wufoo Wufoo is one more free online form creating website. I don't know the actual limit of adding choices, but I added up to 23 choices for a question. You can also view the individual responses of people.
