# Photo Wall Ideas

www.livelovediy.com

Gallery wall layout ideas. Template gallery wall layout generator. Gallery wall layout sizes. Layout staircase gallery wall template. Gallery wall layout rules.

Gallery walls. The best way to make a big statement in your home. We all know about the ooh's and ahh's they inspire. But how do we hang them? What if there was just a an easy gallery wall template that told us what to do? Lucky for you—there is. The answer: a life-size Framebridge hanging guide, that comes with all of our gallery walls. It makes the whole process of hanging a gallery wall so much easier. Just tape the hanging guide to the wall in your desired spot, hammer in the nails where the x's tell you to, rip the hanging guide away, then hang the frames! It might be a little easier to show you. So check out some of our most popular gallery walls and the life-size, easy-to-use hanging guides that make having them in your home possible. How to Use A Framebridge Hanging Guide Step 1: Tape up your hanging guide. Use painter's tape to tape the hanging guide to your wall. The outline of the frames will show where they will hang. In this step, be deliberate about where exactly you want your frames. You can hold them up against the outline to see for yourself! Step 2: Nail in your nails. Each Framebridge gallery wall comes with the proper hanging hardware included. So no digging through the toolbox for nails! There are small x's on the hanging guide where your nails should go. See below for how the nails are put in for the Triptych gallery wall—one of our most popular. Step 3: Tear away the Framebridge hanging guide. The nails will stay right where they are! Step 4: Hang your frames! The nails are good to go and you're good to hang your frames. It may take a little tweaking, adjusting and extra love to get all your frames lined up the way you want (hint: levels are your friend). But the final result will be gorgeous. Shop the Triptych More Framebridge Hanging Guide Inspiration The Staggered Grid @rustandtrust @rustandtrust Shop the Staggered Grid Custom gallery walls. Want to make some changes to the gallery walls we offer or do something completely custom (like this or this or this)? Try our gallery wall consultation service—where expert designers help create a wall for your space. Since each custom design service creates a unique gallery wall, this service does not include a life-size hanging guide, but does include step-by-step hanging instructions that will give you the total confidence to hang your gallery wall. Gallery Wall Videos More of a visual learner? No problem. We've got Framebridge gallery wall hanging guide videos that have your back—the best gallery wall template imaginable. There's only one step left. Shop All Gallery Walls Gallery walls are a great way to showcase your favourite photos and pieces of art. They can be designed for any space in your home, from the smallest of bedrooms to the largest of living rooms. Gallery walls are also fantastic for those spaces which can be awkward to decorate, like staircases or hallways. We thought it would be fun to feature some of the photos our amazing customers have shared displaying the gallery walls they've created. And to help inspire you with your own designs, we've also included layout templates for each example, with details of the print or frame sizes. Tip: Bookmark this page to come back to when you're ready to create your own photo gallery wall, or right-click any of the templates to save them (or hold your thumb over the image if you're on your phone). Living Room Gallery Wall Ideas The living room is one of the more popular rooms to create a photo gallery wall, and for good reason! Oftentimes, this space has at least one large wall that acts as the perfect blank canvas for creating a gallery wall. In addition to that, the living room is also a go-to for showcasing favourite photos and art pieces because so much time is spent in this space. It's only natural that you'd want it to include beautiful decor you're excited to look at day in and day out! Although these layouts would work in nearly any room, here are several gorgeous living room gallery walls. Click on any image throughout this post for photo credit. Entryway, Hallway, & Staircase Gallery Walls Entryways, hallways, and staircases are often neglected in terms of decorating because they present us with unique challenges, like odd angles or a very narrow space. In fact, we have a whole article dedicated to tips and ideas for arranging pictures in a staircase. Check out these hallway and staircase gallery walls for some inspiration. A Versatile Photo Gallery Wall Design Because a gallery wall is a collection of different prints, you can use the same pieces to create a whole new look down the road when you feel like your space needs a refresh. You can rearrange the layout on the same wall, add new prints to the gallery wall overtime, or even break the gallery wall up and display your prints separately throughout your home. Your options are endless! This first photo below shows a gallery wall of wedding photos a Posterjack customer shared. The image below the gallery wall template graphic is a second photo our customer shared using the exact same prints in the same space, just with an alternative layout. We're told they plan to update the space again soon, as their family grows. That's so exciting! Related: 8 Wedding Photos Printed 8 Ways Large Prints, Large Impact Gallery walls can be created using any number of prints. Some people prefer the look of combining several prints in various sizes, others love to combine photos with artwork and other pieces of decor, while still others like to decorate their space with just two or three large prints, like the example below. Corner Office Gallery Wall Expanding your gallery wall to be on more than one wall is another great idea that can look fantastic in spaces where the furniture is near a corner wall, whether that's a crib in a nursery, a oversized recliner in a living room, or a corner office desk, like in this example below. Gallery Wall Ideas & Layouts There are endless ways you can create a gallery wall, and there really is no right or wrong way to do it, which is one of the reasons why they're such a fantastic way to decorate! You can mix and match photos with artwork, include colour images with black and whites, have frames in various sizes and colours, or choose to have them all exactly the same. Even better, you can add to the gallery wall as time goes on, or break it up to display the pieces in separate locations in your home. Whatever your decor style and preference is, we hope these ideas help inspire you to create your own gallery wall. Of course, we would also love to help you create those special pieces too! We offer a large variety of photo art products—all of which are made in Canada from our Toronto location—so are confident we can offer something that's perfect for your own gallery wall design. As always, if you have any questions, please feel free to reach out to our amazing support team, they're more than happy to help! Keep reading: 5 Helpful Tips for Creating a Gallery Wall of Family Photos The gallery wall, also called photo wall, is widely popular and is definitely here to stay! In this guide, we have collected our very best tips on what to think about when you want to create a masterpiece. How do you customise the gallery wall to the geometry of the room? What motifs and frames fit together? How do you hang up the pictures in the best and easiest way? We have all the answers! Find our best tips below. Shop this gallery wall 5 STEPS TO THE PERFECT GALLERY WALL 1. Find Inspiration The first step is to find your personal style and decide what you like. A convenient tip is to check out our arrangements and layout suggestions further down on this page, as well as our inspiration section that provides suggestions for great gallery wall combinations. Also have a look at our 'Shop Instagram' page that shows what our posters look in our valued customers' homes. Shop this gallery wall 2. Tailor to the room The size and style of the photo wall is often determined by where it is placed. Standing frames can be placed nicely on a picture rail or chest of drawers, you can advantageously place frames against the wall and blend them with ornaments to form a beautiful still life. If the frames are hung above a piece of furniture, such as a couch in the living room, you get a good balance by starting from the width of the furniture and centering the frames above. A guideline is to hang the posters so that they are further away from the ceiling than the furniture below. For the best balance, the distances between the frames should be based on the furniture it hangs above. If the gallery wall is large in relation to the furniture, the distances should be small and vice versa. Shop this gallery wall In this picture frames have a larger space in between, because the gallery wall is smaller in relation to the couch below. Picture by @ameliesjobring. 3. Choose your favourite prints and create your arrangement To facilitate this step, we've compiled templates for different gallery wall geometries below and printed their size to make it easier to find a layout that fits your chosen place in your home. You can also compose a photo wall by yourself, there are no rules to what fits your own style. One good tip however is to start from a straight bottom or top, or from a larger poster in the middle and placing smaller posters around it. Shop this gallery wall 4. Find the harmony between posters and frames! You have different styles and colours on your poster motifs, it is recommended to focus on uniform frames to create a harmonious impression. If you have motifs in one style, such as only black and white posters, you may want to mix frames of different varieties. For example, it looks great to combine black and white wooden frames. Shop this gallery wall 5. The best way to attach the frames to the wall Determine how big your gallery wall will be by adding the widths of all frames and the distances between each one. Then measure the total width of your gallery wall and mark the corners. This way you can make sure the entirety of the gallery wall gets centered correctly above the surrounding furniture. Start in a corner and place the frame in the right place, make a small dot with a pencil in the center above the frame. Measure the distance from the top of the frame to the hanger and measure the same distance from the dot on the wall. Hit a nail into place and hang up the first frame. Then you simply repeat these steps with all frames, one at a time, based on the position of the first frame you put up. If your gallery wall is hanging on a picture rail or placed on a chest of drawers, just play around a bit and adjust them until you are satisfied with the way it looks. GALLERY WALL TEMPLATES These are a few suggestions for stylish and well-balanced templates for gallery walls. We have included the sizes of each of the frames below. Template for Medium Gallery Wall - 4 Frames The frames are 4 cm apart and the gallery wall has a total width of 138 cm (including spaces). The total height is 84 cm.
