material. Several popular filaments can be bought with carbon fiber fill including PLA, PETG, Nylon, ABS, and Polycarbonate. These fibers are extremely strong and cause the filament to increase in strength and stiffness. 22/05/2003 - Properties Carbon/Epoxy Composite Tube; Property : Value: Material : High Precision Tubes: Thermal Expansion Coefficient - Longitudinal: x10-6 K-1: 0.1; Volume fraction of fibres % 55 - 60: Young's Modulus - Longitudinal: GPa: 110 - 120: Properties Carbon/Epoxy Composite Rod; Property : Value: Compressive Strength - Longitudinal: MPa: 800 ... Note: Properties of carbon fiber composites are dependent on the direction and the properties shown above are ONLY valid for one direction, typically referred to as the longitudinal direction. Disclaimer: This data and information shown should only be used for comparison purposes.It should not in any way be used for design purposes as actual properties will vary based on ...
